

AP Project deadline-1

Group 143
Aryan Malik-2021315
Vansh-2021363

For this deadline, We have submitted a pdf with UML, skeleton screens (with UI components in it) which has working buttons using which we can switch between screens and submitted java files for classes without body but containing the class relationships and hierarchy, method declarations and also submitted script for generating the UI.

We have used JavaFX, maven in IntelliJ.

We have used class relationships and OOPS principles like inheritance, composition, association.

I have declared 7 classes:

HelloApplication: Has the start method.

HelloController: Has methods to control the GUI flow.

Hero: Class for main character.

Player: Class for relation between hero and other classes.

Platform: Class for platform using randomize function to generate different width and distance between two platforms.

Stick: Class for Stick.

Cherry: Class for cherry.
